WHO WE ARE

The German Renewable Energies Agency provides advocacy for a swift and complete transition to a sustainable energy supply. It is our mission to strengthen the public support for renewable energies in the power, heat and transport sectors. Therefore we communicate the advantages and opportunities of renewables while debunking myths and misconceptions about them.

The Renewable Energies Agency is supported by companies and associations from the renewable energy industries. We work throughout Germany on a cross-party and cross-society basis. Several of our communication projects are funded by the Federal Ministry for Economic Affairs and Energy as well as by the Federal Ministry of Food and Agriculture.

We are a founding member of the IRENA Coalition for Action to Bolster Public Support for Renewable Energies and have a well established network with several European institutions and NGOs as well as overseas partners.

INTERNATIONAL ACTIVITIES

With our long standing expertise in renewable energies, we contribute to the international exchange of information, knowledge, experience and best practice in Germany and beyond.

Our international work includes:

- English language website www.renewables-in-germany.com featuring infographics, videos and background papers on various renewable energy issues in English and Japanese
- English and Japanese language brochures debunking common myths and misconceptions about renewable energies
- Expert lectures and presentations at international conferences and events
- Editorial contributions to various media and information sources worldwide
- International delegation programs and press tours

MAJOR PROJECTS IN GERMANY

- www.unendlich-viel-energie.de
The comprehensive information platform with regular updates on all issues relevant to renewable energies in Germany.
- www.foederal-erneuerbar.de
Internet database showing the status quo of the energy transition in each of Germany's 16 federal states along with the latest facts and figures.
- www.kommunal-erneuerbar.de
Hands-on knowledge for local policy-makers engaged in renewable energy projects with monthly best practice examples, conferences and an internet knowledge base.
- www.energie-studien.de
Keeping track of the vast number of scientific surveys and reports on the energy transition, the project provides clear insights into research on renewable energy issues.
